This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

WALLACE'S

AMERICAN TROTTING REGISTER,

CONTAINING THE PEDIGREES OF

STANDARD-BRED TROTTERS,

AND AN

APPENDIX OF NON-STANDARD ANIMALS.

PUBLISHED UNDER THE AUTHORITY OF

THE NATIONAL ASSOCIATION OF TROTTING-HORSE BREEDERS.

BY JOHN H. WALLACE,
Editor of Wallace's Monthly.

VOLUME VIII.

NEW YORK:
PUBLISHED BY WALLACE TROTTING REGISTER COMPANY.

1890.

-13367-

Entered, according to Act of Congress, in the year 1890, by
WALLACE TROTTING REGISTER COMPANY,
in the Office of the Librarian of Congress, at Washington, D. C.

CHARLES D. SIBLEY,
PRINTER,
18 Rose Street, New York.

PREFATORY REMARKS.

IN PRESENTING the eighth volume of the Register to the public there is but little to be said either in the way of comment or explanation. The numbers of pedigrees coming for registration seem to be constantly increasing, and with this increase there is a very marked improvement in the quality of the blood offered. At no time in all the past has the enlightened judgment of breeders taken so strong a hold upon the value of an unbroken inheritance of producing and performing blood.

The elimination from the standard of Rule 7, under which colts could be registered and numbered as standard-bred when "by a standard horse and out of a mare by a standard horse," has had a very marked effect in the comparative numbers of stallions registered in this volume. Under the old rule, every colt that could get in under Rule 7 came forward promptly and demanded his number, and thus the sexes got clear out of balance. In this volume there is a falling off of about thirty-three per cent. in the department of stallions, and this comes chiefly from the exclusion of colts with only two crosses.

The increase in the number of volumes, and the cost of the same when sold in sets, is becoming a serious matter to breeders. It therefore seems to be necessary to condense entries into the smallest space possible consistent with plainness and perspicuity. With the sire and dam given, and then followed with a reference to where the dam is registered for the extension of the pedigree, all the purposes of registration would be accomplished and much space saved. This saving of space must be effected in the brevity of the pedigree, for the historical features cannot be condensed. As a matter of course, every man wants his pedigrees inserted as fully as possible, even if each one should be spread out over a whole page; but it must be remembered that the Register is not an advertising medium merely, but a condensation of all the facts necessary to trace all the lines, by reference, in every pedigree.

The Register has reached a position which no other publication of the kind has ever achieved. Out of nothing it has grown to a position of trust and power that is felt in all portions of the land, and the value of all trotting horses is very largely determined by whether their pedigrees are here recorded. This result never could have been reached had it not been for the great body of intelligent and honest breeders everywhere who stood by it in its hours of adversity as well as prosperity.

JOHN H. WALLACE.

NEW YORK, January 15, 1890.

THE STANDARD.

[AS REVISED AND ADOPTED BY THE NATIONAL ASSOCIATION OF TROTTING-HORSE BREEDERS, DECEMBER 14, 1887.]

IN order to define what constitutes a trotting-bred horse and to establish a BREED of trotters on a more intelligent basis, the following rules are adopted to control admission to the records of pedigrees. When an animal meets the requirements of admission and is duly registered it shall be accepted as a standard trotting-bred animal.

FIRST.—Any stallion that has himself a record of two minutes and thirty seconds (2:30) or better, provided any of his get has a record of 2:35 or better, or provided his sire or his dam is already a standard animal.

SECOND.—Any mare or gelding that has a record of 2:30 or better.

THIRD.—Any horse that is the sire of two animals with a record of 2:30 or better.

FOURTH.—Any horse that is the sire of one animal with a record of 2:30 or better, provided he has either of the following additional qualifications: (1) A record himself of 2:35 or better. (2) Is the sire of two other animals with a record of 2:35 or better. (3) Has a sire or dam that is already a standard animal.

FIFTH.—Any mare that has produced an animal with a record of 2:30 or better.

SIXTH.—The progeny of a standard horse when out of a standard mare.

SEVENTH.—The female progeny of a standard horse when out of a mare by a standard horse.

EIGHTH.—The female progeny of a standard horse when out of a mare whose dam is a standard mare.

NINTH.—Any mare that has a record of 2:35 or better, and whose sire or dam is a standard animal.

CONDITIONS OF ADMISSION TO NON-STANDARD DEPARTMENT.

FIRST.—Stallion colts when by a standard horse and out of a mare by a standard horse. No numbers given.

SECOND.—Mares and geldings by standard horses, without further pedigree.

THIRD.—Pacers of all sexes that would be eligible to standard rank if their records had been made at the trot instead of the pace.

FOURTH.—All sires of two or more dams that have produced a 2:30 trotter.

FIFTH.—Animals that are historical and whose pedigrees are worthy of preservation.

NATIONAL ASSOCIATION OF TROTTING-HORSE BREEDERS.

OFFICERS FOR 1890.

PRESIDENT—Henry W. T. Mali, New York.
FIRST VICE-PRESIDENT—Hon. Leland Stanford, California.
SECOND VICE-PRESIDENT—Hon. I. V. Baker, Jr., New York.
THIRD VICE-PRESIDENT—A. J. Caton, Illinois.
SECRETARY—L. D. Packer, New York.
TREASURER—J. W. Gray, New York.
EXECUTIVE COMMITTEE—Charles Backman, New York; B. F. Tracy, New York; William F. Redmond, New Jersey; Samuel A. Browne, Michigan; C. F. Emery, Ohio; S. H. Rundle, Connecticut; J. C. Sibley, Pennsylvania; W. B. Dickerman, New York.
BOARD OF CENSORS—Guy Miller, Chester, N. Y.; W. B. Dickerman, New York City; E. G. Doolittle, Cheshire, Conn.; E. H. Pratt, New Jersey; Charles E. Ford, New York City.

ALL STANDARD-BRED MARES SHOULD BE REGISTERED.

The importance of registering all standard-bred mares before their progeny are registered has been demonstrated by experience. Until recently we have not insisted upon this, because it might seem to be an unnecessary tax upon breeders, but we have reached a point where it is imperative that we should insist upon it. The registration of a standard dam or a grandam or a great-grandam involves the putting on record of all the particulars about those mares, and this is just what is needed in order to make the records more satisfactory.

When a mare produces a 2:30 trotter, if she has been already registered in the usual form and still remains the property of her original owner, we will insert her with a full list of her produce, without any additional charge. As a matter of course the list of produce must be complete and correctly given as to age, sex, color, etc. If breeders will look more carefully after this feature of the Register it will be greatly to their own advantage and will give increased satisfaction to all.

EVIDENCE REQUIRED.

1. No rule can be laid down as to what will be accepted as evidence until we see it.

2. Send for blanks, which will be furnished gratuitously, study their requirements and comply with them.

3. Give the name, description and breeder of each of the dams, and be careful to stop where your knowledge stops.

4. Establish the identity and history of every dam before you ask us to accept her. Accept nothing that does not come from the breeder.

5. Attempts are often made to strengthen weak cases by writing out a statement and swearing to it. In most cases such oaths are of no value.

6. A plain personal statement from a man who knows what he asserts is worth more than a cart-load of the usual "affidavits."

7. When reference can be made to an animal already registered, much labor may be saved to both the owner and the compiler.

8. It is not impossible to put a pedigree with spurious extensions upon the compiler, but sooner or later the fraud will be detected.

ABUSES IN NAMING HORSES.

1. The rule with regard to naming colts is definite and explicit. It was first adopted by the Board of Censors and then by the Association.

2. There can be no more "Hambletonians," "Mambrinos," "Clays," "Wilkeses," "Pilots," "Nutwoods," "Electioneers," etc., either singly or in combination with some other name, unless the colt is a son of the original of the name.

3. There are no special restrictions in naming fillies and mares, but duplications should be avoided as far as possible.

4. Through courtesy to the trotting associations and to save owners the expense of fifty dollars for changing names, we have been in the habit of accepting the names under which animals have started in trotting contests.

5. If a contest is gotten up merely for the purpose of securing a name and not in good faith as a contest, such name will not be accepted.

6. A few unscrupulous people have seen fit to change the names of their horses after registration, retaining the numbers given with the original names. This at once throws all registration into confusion, and to meet it we must reject from registration the progeny of all such horses.

Estie, (6) bl. m. foaled 1888; by Patchen Wilkes, 3550; dam Miss Bell, by Coronet, 1035; g. d. Snowbell, by Belmont, 64; g. g. d. Miss Montagne (dam of Richard Wilkes, 2:29¼), by Snowstorm (Wilson's), etc. [See Miss Bell, Vol. VI.] Bred by Henry C. Jewett & Co., Buffalo, N. Y.

Etalka, (7) b. m. foaled 1879; by William M. Rysdyk, 5703; dam by Sir Henry, 285; g. d. said to be by Chance (Miller's), son of Chance. Bred by Silas Halsey, Lodi, N. Y.; passed to N. A. Andrews; then to John A. Logan Jr., Youngstown, Ohio.

Ethan Allen's Dam, (5) gr. m. foaled about 1825, and probably got by a grey two-year-old colt, surreptitiously, of unknown breeding. Bred by A. Potter; passed to Reuben Potter; then to Rufus Rising; then to George Johnson; then to Caleb Balcom; then to William H. Balcom; then to Ira Wallace; then to Warner Cook, Hague, N. Y.; then to George W. Weed; then to Joel W. Halcomb, Ticonderoga, N. Y. Died in the spring of 1851. This is Mr. A. W. Thomson's tracing of this mare, and is probably correct. Nothing is known of her blood, but her color, form, and speed at the trot, seemed to justify the phrase "Messenger Mare" which was generally applied to her. Previous to 1841 she had four foals, not enumerated.

1841, b. c.,	by Young Sir Charles [Burge Horse].
1842, b. f.,	by Young Sir Charles.
1843, gr. c.,	by Roger's Horse or Young Sir Charles.
